Above: model from the Landscape series by Kettal designed by Kettal Design Studio. Adjoining: timeless elegance in Sutherland's Great Lakes collection designed by Terry Hunziker. The furniture is made from Eco-plex and cast aluminium. Eco-plex is a composite material made from 97%-recycled plastics and created according to David Sutherland's specific requirements. The material used for the upholstery of the outdoor models is maintenance free and has great colour stability. The photos show Sutherland's lounge chair and chaise-longue. Below: parasols by Tuuci of Miami, made to withstand gales and for use aboard yachts for example. Right-hand page: a modern 'classic' from Emu - the Vera designed by Chiaromonte Marin.
