Pretty enough to be inside but made to withstand the elements, Silver State fabrics new HORIZONS Sunbrella collection offers a clean and elegant palette for outdoor applications. Luminous (a satin weave solid) and a plush Sunbrella velvet offer a break from traditional outdoor fabric choices. Available to the trade. | sunbrella.com

Louis Soleil dining side chair from Sutherland adds a regal touch to summer languor, with supportive carved-wood arms and seat cushioning stuffed with flow-through foam wrapped in Dacron. The teak frame is available in three finishes: natural, weathered or exterior sealer. | sutherlandteak.com

Designer Philippe Starck, in collaboration with David Sutherland, takes inspiration from the history and legend to present an appealing, intelligent and urbane collection of outdoor furniture. RobinWood Deluxe Collection conjures images of archetypal 13th Century England, but this collection is far from medieval. The Sherwood Sunbed combines wood and highly polished aluminum in a design that is modern yet suggests a surprising classicism. | sutherlandfurniture.com
